
[Modified Bitumen Membrane Production Line \(Modified Bitumen Membrane Machinery\)](#)

Modified Bitumen Membrane Production Line (Modified Bitumen Membrane Machinery)

Modified bitumen membrane is a composite sheet made from bitumen, reinforcements and modifiers. A common modified bitumen system is mainly made up of polymer-modified bitumen reinforced with one or more layers of polyester or fiberglass.

The polymer modification and reinforced sheet make the modified bitumen membrane enjoy higher tensile strength.

Our modified bitumen membrane production line is specially designed to produce various modified bitumen membranes for both commercial and some residential applications.

Distinctive Features and Advantages

1. Our modified bitumen membrane production line uses special modified bitumen technology and highly effective mixing and coating technology which ensures high production capacity.
2. Our customized design could be used to produce various types of modified bitumen membranes to meet different requirements.
3. The modified bitumen membrane machinery is fitted with effective emission control system, so it is environmentally friendly.

Technical Parameter of Modified Bitumen Membrane Production Line (Modified Bitumen Membrane Machinery)

Production capacity	3-10 million m ² /a, more challenging production also available
Reinforcing material	Polyester, fiberglass mat
Modifier	SBS, APP, IPP and etc
Facing material	Sand, Mineral granule, PE film, Aluminum foil
Workshop dimension (L×W× H)	60m × (12-15)m × (6 - 8)m as per production capacity

We are a premier manufacturer of modified bitumen membrane production line in China with over 30 years experience in mechanical manufacturing. Apart from complete production line, our expertise is also reputed in providing all range of technology upgrade and reinforcement.

Besides all kinds of insulation equipment such as rock wool, glass wool, ceramic fiber production line we are also leading in supplying material processing and handling equipment like plastic pipe making machine, roll forming machine, cranes etc.

If you want to know more detailed information, please feel free to contact.
