## [Ceramic Fiber Board](#)

### **Ceramic Fiber Board**

Vacuum formed ceramic fiber boards are manufactured from the desired grade of ceramic wool and organic binder. It has light weight and thermal-insulation efficiency. Its low conductivity and excellent thermal performance result in a wide range of applications.

#### **Parameters of Ceramic Fiber Board**

Nominal Density (Kg/m <sup>3</sup> )	Thickness (mm)	Dimension (L x W mm <sup>2</sup> )
80 - 140	15 - 100	As per needs

Powered by our technologically know how and our quality production line, we manufacture higher quality products with more excellence and safety features. Our ceramic fiber products consist of ceramic fiber board, ceramic fiber blanket and ceramic fiber paper. Our products cover a large range of density and thickness to meet any individual requirements.

Our thermal insulation products also include rock wool products and glass wool products. Please refer to the individual page for more detailed specification.

For detailed inquiry or consultancy, we welcome you to contact us directly.
