
[Glass Wool Board](#)

Glass Wool Board

Our glass wool board features excellent thermal insulation performance with high load bearing capacity and low density. It is very strong, durable and versatile with a wide range of applications. It can be applied in light wall, ceiling, frame, basement and much more.

Parameters of Glass Wool Board

Nominal Density (Kg/m ³)	Dimension		
	Length(mm)	Width(mm)	Thickness(mm)
15 - 50	1200	600 / 1200	10 - 100

Powered by our technologically know how and our quality production line, we manufacture higher quality products with more excellence and safety features. Our glass wool products consist of glass wool board, glass wool blanket and glass wool pipe section with or without facing or stitching treatments. Our products cover a large range of density and thickness to meet any individual requirements.

Our thermal insulation products also include rock wool products and ceramic fiber products. Please refer to the individual page for more detailed specification.
