
[Rock Wool Blanket](#)

Rock Wool Blanket

Our rock wool blanket features outstanding thermal resistance, high strength, good sound absorbing ability, and safety. It is suitable for use where high temperature and fire resistance are of great concerns, like O.E.M industries, drying or curing equipment, petro-chemical, and power generating plant, boiler, furnace and much more.

Parameters of Rock Wool Blanket

Classification	Nominal Density(kg/m ³)	Dimension		
		Length(mm)	Width(mm)	Thickness(mm)
Rock wool blanket	40 - 100	10000(adjustable)	500 / 1200	30 - 100
Stitched blanket	40 - 90	1200(adjustable)	500 / 1200	40 - 100

Powered by our technologically know how and our quality production line, we manufacture higher quality products with more excellence and safety features. Our rock wool products consist of rock wool board, rock wool blanket and rock wool pipe section with or without facing or stitching treatments. Our products cover a large range of density and thickness to meet any individual requirements.

Other thermal insulation products also include glass wool products and ceramic fiber products. Please refer to the individual page for more detailed specification.
