
[Rock Wool Pipe Section](#)

Rock Wool Pipe Section

A rock wool preformed pipe is a rigid, high density insulation pipe manufactured from rock wool and certain binder.

Parameters of Rock Wool Pipe Section

Classification	Nominal Density(kg/m ³)	Thickness (mm)	Diameter (mm)
Rock wool pipe	80 - 120	30 - 100	Φ20 - Φ630

Rock wool pipe section is designed for use over a wide temperature range, to insulate all sizes of pipes in intense moisture environment.

Powered by our technologically know how and our quality production line, we manufacture higher quality products with more excellence and safety features. Our rock wool products consist of rock wool board, rock wool blanket and rock wool pipe section with or without facing or stitching treatments. Our products cover a large range of density and thickness to meet any individual requirements.

Other thermal insulation products also include glass wool products and ceramic fiber products. Please refer to the individual page for more detailed specification.

For detailed inquiry or consultancy, we welcome you to contact us directly.
